

RAFAEL RICHIE

Fullstack Developer | AI/LLM Engineer

+62-812-8430-0979 | rafaelfrichie03@gmail.com | [Rafael Richie - Portfolio Website](#)

PROFESSIONAL SUMMARY

Experienced Fullstack Developer with expertise in web application development, LLM-based chatbot engineering, agentic AI systems, and robotic process automation. Skilled in building end-to-end AI solutions using Model Context Protocol (MCP), Retrieval-Augmented Generation (RAG), and multi-agent orchestration frameworks.

WORK EXPERIENCE

PT. Prima Integrasi Network

June 2024 - Present

Full Stack Developer

- Developed LLM-powered chatbot using Streamlit Python and Ollama LLM for internal automation use cases
- Built agentic AI systems using Model Context Protocol (MCP) for advanced AI-driven process automation
- Engineered RAG (Retrieval-Augmented Generation) pipeline with Langchain, Ollama, ChromaDB, and VectorDB integrated with ReactJs frontend
- Developed social media super-app using ReactJs and Python Flask
- Implemented Robotic Process Automation (RPA) workflows using TagUI to streamline business processes
- Built and maintained applications across multiple databases: Couchbase, SQLite, MySQL, SinglestoreDB, MongoDB
- Implemented application security with JWT token authentication, 2FA via Google and Microsoft
- Developed responsive UI with Bootstrap, TailwindCSS, PrimeReact, and VantaJS
- Built conference meeting integration using Jitsi Meet
- Developed company profile websites and internal tools

PT Rakai Digital

June 2025 - Present

Full Stack Developer (Freelance)

- Developed Android transportation app using React Native featuring ticket booking system, real-time GPS tracking, payment gateway integration, and support for both public transit and private taxi services
- Built a tenant ticketing system for maintenance requests using React Native (Android), integrated with WhatsApp via Model Context Protocol (MCP) for automated notifications and workflow updates
- Developed a healthcare platform for nurses and doctors comprising a React Vite web app and React Native mobile app, with payment gateway and real-time online consultation chat (prototype)
- Developed a cooperative inter-store integration application to synchronize inventory and operations across multiple cooperative branches (prototype)

Youthopia, Malaysia

February 2024 - March 2024

Full Stack Developer (Internship)

- Developed company profile web application with ReactJs frontend and NodeJs backend server
- Integrated Stripe payment system using NodeJs for online transactions
- Implemented UI/UX design based on client requirements

RPG Ventures, Malaysia

November 2023 - December

Data Analyst & Frontend Developer (Apprenticeship)

2023

- Built internal applications using Google AppSheet
- Performed data cleansing and transformation using DBT (Data Build Tool) pipelines
- Explored and implemented Python automation scripts for operational workflows

EDUCATION

Universitas Pembangunan Jaya

September 2022 - Graduated

S1 Sistem Informasi | IPK: 3.33

Lithan Academy

September 2022 - October 2023

Bachelor's Degree in Software Engineering (BDSE)

TECHNICAL SKILLS

AI/LLM/Agentic Systems:

LLM Development (Ollama LLM, Langchain, Streamlit Python), Agentic AI (Model Context Protocol, MCP orchestrator, multi-agent workflow orchestration, tool-use integration), RAG (ChromaDB, VectorDB, document ingestion pipelines), AI Automation (Robotic Process Automation with TagUI, process orchestration).

Frontend Development:

ReactJS, React Vite, Typescript, NextJS, React Native (mobile), HTML, CSS, JavaScript, JQuery, Bootstrap, TailwindCSS, Prime React, VantaJS, Axure (UI/UX prototyping).

Backend Development:

NodeJs, Flask Python, Java Spring Boot, Spring MVC.

Databases:

Relational (MySQL, SQLite), NoSQL (Couchbase, MongoDB, SinglestoreDB), Vector (VectorDB, ChromaDB).

Tools & Platforms:

Security (JWT Authentication, 2FA Google & Microsoft), Payment (Stripe API), Video Conferencing (Jitsi Meet integration), Data (DBT Pipelines, Google AppSheet).
